What YOU should know about "The Weeks Report"

a big step forward for the people of the United States

Legislation has been introduced to Congress which would bring up to date Uncle Sam's long out-moded regulations controlling this nation's transportation industry. *This is important to you.*

This legislation is based on recommendations contained in "The Weeks Report" — the report of President Eisenhower's *Advisory Committee on Transport Policy and Organization,* composed of the Secretary of Commerce, four other Cabinet members and two other high-ranking government officials.

what did this report say about present transportation conditions ?

"Within the short span of one generation this country has witnessed a transportation revolution";

That the government's failure to adjust its regulatory policy to changed conditions has "borne heavily on the common carrier segment of the transportation industry" and has added greatly to the costs of transportation — costs which must be paid by "the shipper and ultimately the consuming public."

what remedy does the Cabinet Committee recommend ?

"Common carriers . . . be permitted greater freedom, short of discriminatory practices, to utilize their economic capabilities in the competitive pricing of their service".

Passage by Congress of legislation giving effect to the Cabinet Committee's recommendations would not give railroads any right that other forms of transportation do not already have or would not receive. This legislation recognizes that each of the competing forms of transportation has advantages in handling different kinds of shipments, moving between different points, and over different distances.

If you agree...

That each type of carrier should be given the freest opportunity to do the job it can do best, at the lowest reasonable cost, *support this legislation.*

IT IS THE DIRECT WAY TO THE BEST AND MOST ECONOMICAL TRANSPORTATION SERVICE, TO THE BENEFIT OF BUSINESSMEN, TAXPAYERS AND THE CONSUMING PUBLIC — WHO, IN THE END, PAY ALL TRANSPORTATION COSTS.

consider the situation U.S.Railroads face today

Here is a basic industry, performing a service essential in peace and irreplaceable in war; providing, maintaining and continually improving — at its own expense — the roadways and other extensive facilities it uses (and paying taxes on them, besides); directly employing more than one million people; operating with steadily increasing efficiency; and financed conservatively, with a steadily decreasing total of fixed charges —

YET here is an industry which earns a return on investment of only about 3½% — among the lowest of all industries; *an industry so restricted by application of laws governing transportation that frequently it is not permitted to price its services on a competitive basis.*

EMPLOYMENT

With a record total of 65,161,000 persons employed in October, employment in the United States reached its highest peak. The total is about 400,000 more than for October, 1954, and 2,408,000 more than the previous October record reached in 1953. The work force in agriculture remained at a relatively high level, while non - farm employment rose to a new October peak. Unemployment, which normally drops in October, stayed around 2,100,000.

SURPLUS SALES ABROAD

In the first nine months of 1955, disposals abroad of products held by the Commodity Credit Corporation amounted to $1,300,000,000, or nearly a one-third gain over last year, according to Secretary of Agriculture Ezra Taft Benson. Mr. Benson also stated that he would favor the sale of Government-owned surplus commodities to Iron Curtain countries in exchange for durable goods or dollars.

BUSINESS TO "SELL" U. S.

Those U. S. businesses with foreign branches have agreed to help the Government "sell" the United States to the rest of the world. Representatives of twenty industrial firms and organizations agreed to set up an Industrial Cooperation Council among their overseas branches which will work with the United States Information Agency.
